

## Repair Window Screen

Even though the screen frame is not a moving equipment unlike door, holes were made probably by birds or sun shine. The screen with holes is useless. Replacement is a must and not so difficult although the number of screen frames may be a lot depending upon home you live.

Window Screen to be Replaced, Spline Roller, Knife, Driver, Roll of New Screen (Old Spline still under Use)

Screen Hole

Start from here (Pull up Spline at End)

Final Stage of Pushing down Spline by Spline Roller over the New Screen

Done (Screen Tension Looks Good, Extra Spline Needs to be Cut)
