

## Tips Weed Sticker

Front edge of weed sticker wore off by frequent sticks to the ground for weed removal. The metal portion was replaced by relatively new weed sticker with somewhat short red handle keeping longer wood handle.

Done (Upper 3 Pieces Thrown out)

The fork end was completely wore off around 5 years later.

I purchased two brand-new weed stickers because front metal edge of the third generation sticker wore off again.

However, new sticker looks sturdy but the fork end was too thick to stick. It made too much resistance. I made it sharp by using a metal grinder below.

Continuous multiple time sticking for a long time wore off even fork end made by iron!  
Don't settle. Stick with it forever.
